
a
Methanol: 632 literature candidates, 81 groups
excluded by the bound (394)
evaluated in full (238)
lower bound (EUR t^{-1})
full plant cost, recycled CO (EUR t^{-1})
b
Ammonia alloy and metal surfaces
406 surfaces inside the bed cap shown
(401 bimetallic, 5 pure metal; of 1,695 costed)
Fe 11.52
excluded by the bound (120)
optimized in full (286)
lower bound (USD t^{-1})
full plant cost (USD t^{-1} NH$_3$)
c
Full optimizations saved by the lower bound; plant-cost leaders or sub-Fe surfaces excluded: 0
methanol, recycled CO, 632 candidates
238 evaluated in full
394 excluded by the bound (62.3 %)
methanol, inert CO, 632 candidates
442 evaluated in full
190 excluded by the bound (30.1 %)
ammonia alloys, reference prices, 309 candidates
65 evaluated in full
244 excluded by the bound (79.0 %)
ammonia alloys, reference + USGS prices, 1,695 candidates
296 evaluated in full
1,399 excluded by the bound (82.5 %)
share of candidates (%)
