
a
Methanol: 310 literature candidates, 40 groups
excluded by the bound (199)
evaluated in full (111)
lower bound (EUR t^{-1})
full plant cost, recycled CO (EUR t^{-1})
b
Ammonia alloy and metal surfaces
406 surfaces inside the bed cap shown
(401 bimetallic, 5 pure metal; of 1,695 costed)
Fe 15.29
excluded by the bound (118)
optimized in full (288)
lower bound (USD t^{-1})
full plant cost (USD t^{-1} NH$_3$)
c
Full optimizations saved by the lower bound; plant-cost leaders or sub-Fe surfaces excluded: 0
methanol, recycled CO, 310 candidates
111 evaluated in full
199 excluded by the bound (64.2 %)
methanol, inert CO, 310 candidates
212 evaluated in full
98 excluded by the bound (31.6 %)
ammonia alloys, frozen prices, 309 candidates
66 evaluated in full
243 excluded by the bound (78.6 %)
ammonia alloys, frozen + USGS prices, 1,695 candidates
298 evaluated in full
1,397 excluded by the bound (82.4 %)
share of candidates (%)
